EXPERIENCE

Ateneo de Manila University — *Lecturer*

January 2023 - PRESENT

Prepared curriculums and teaching material for various subjects according to CHED standards, and then managed lectures and exams for classes.

I managed many different subjects, though I am mostly assigned to classes about workshop techniques, microprocessors, and embedded systems.

Various Research Projects — *Researcher (different levels)*

November 2018 - March 2023

I was part of the engineering team that designed, tested, and deployed wireless sensor networks that measure groundwater parameters to different parts of the Philippines.

This work stretched over various different research projects, each with differing jurisdictions of deployment area but with similar work.

EDUCATION

Ateneo de Manila University — *MS Data Science*

August 2019 - May 2021

I published my MS thesis regarding load balancing and learned the foundations of data science.

Ateneo de Manila University — *BS Electronics Engineering*

June 2013 - May 2018

I graduated *cum laude* and learned the foundations of electronics engineering.

SKILLS

Proficient:

Python (pandas, numpy)

Experience:

SQL

R
